From licenses to subscriptions

Rolf McLaughlin (MASUCH)

Cloud Solution Architect

Rolf.McLaughlin@Microsoft.com

We make it easy to order licenses...

in the Azure portal

in the Office 365 portal

in the PowerBI portal

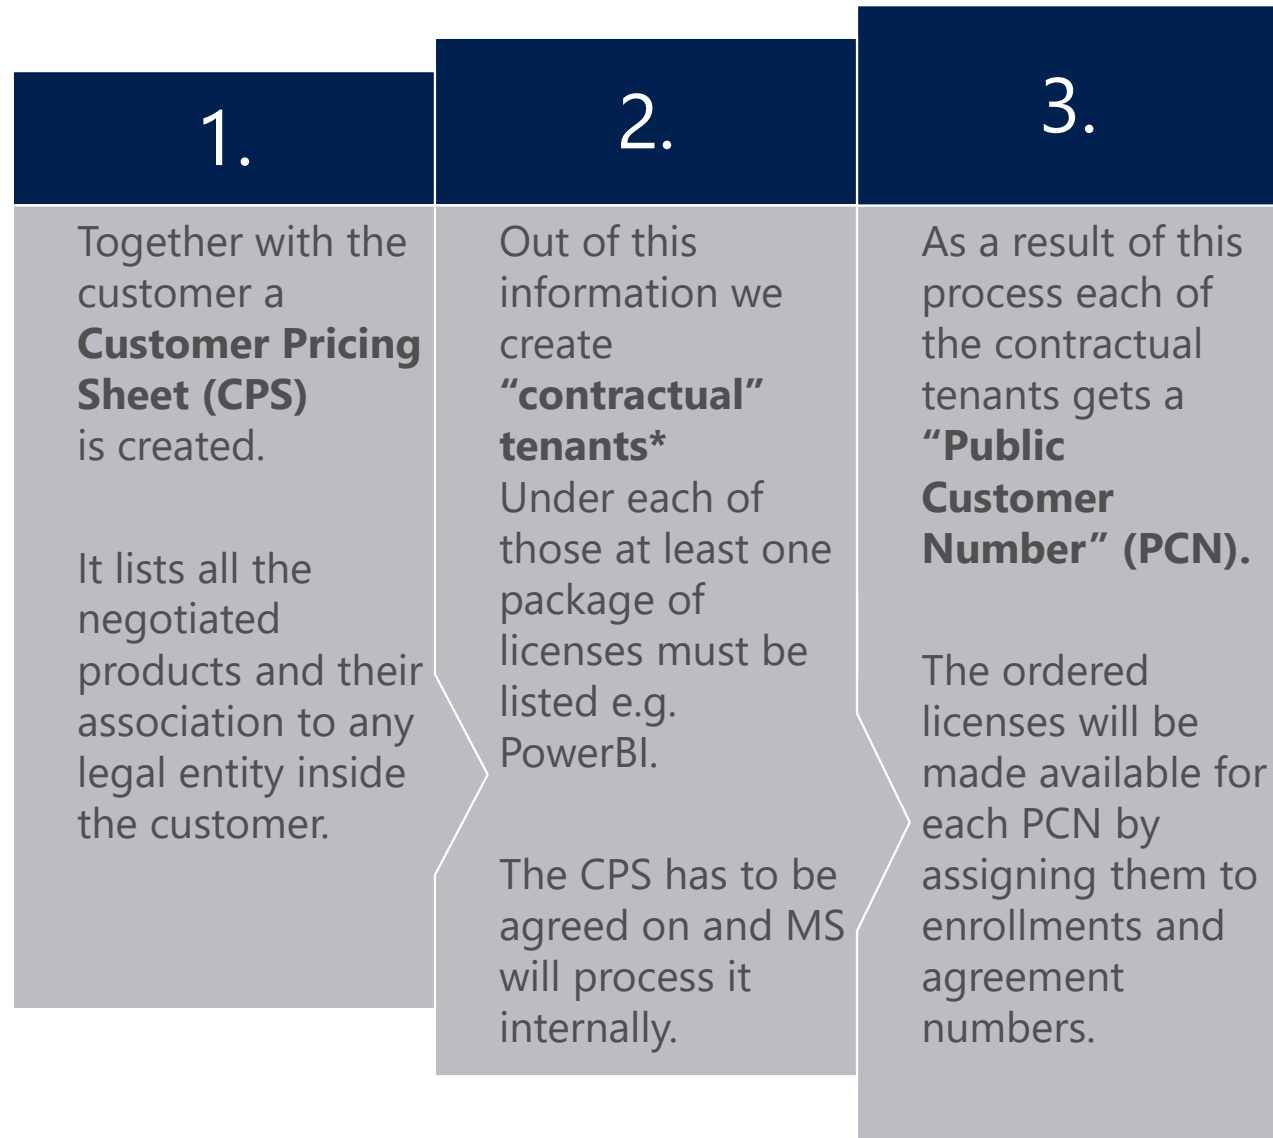

in the product [nnn] portal

Ordering the licenses this way is great and now you want to make sure, that the agreed prices are paid for the products ordered and not the "off the shelf" prices

How we tie it together in the background

* These tenants are not the technical tenants from Azure Active Directory. They are commercial tenants.

How we tie it together in the background part 2

Moving a PCN from one technical tenant to another of the same customer, also moves all assigned licenses to the new technical tenant

To make licenses available in all technical tenants, all of them need a PCN and enrollments with agreement numbers

If more than one tenant is needed a contractual amendment, called M130, has to be added

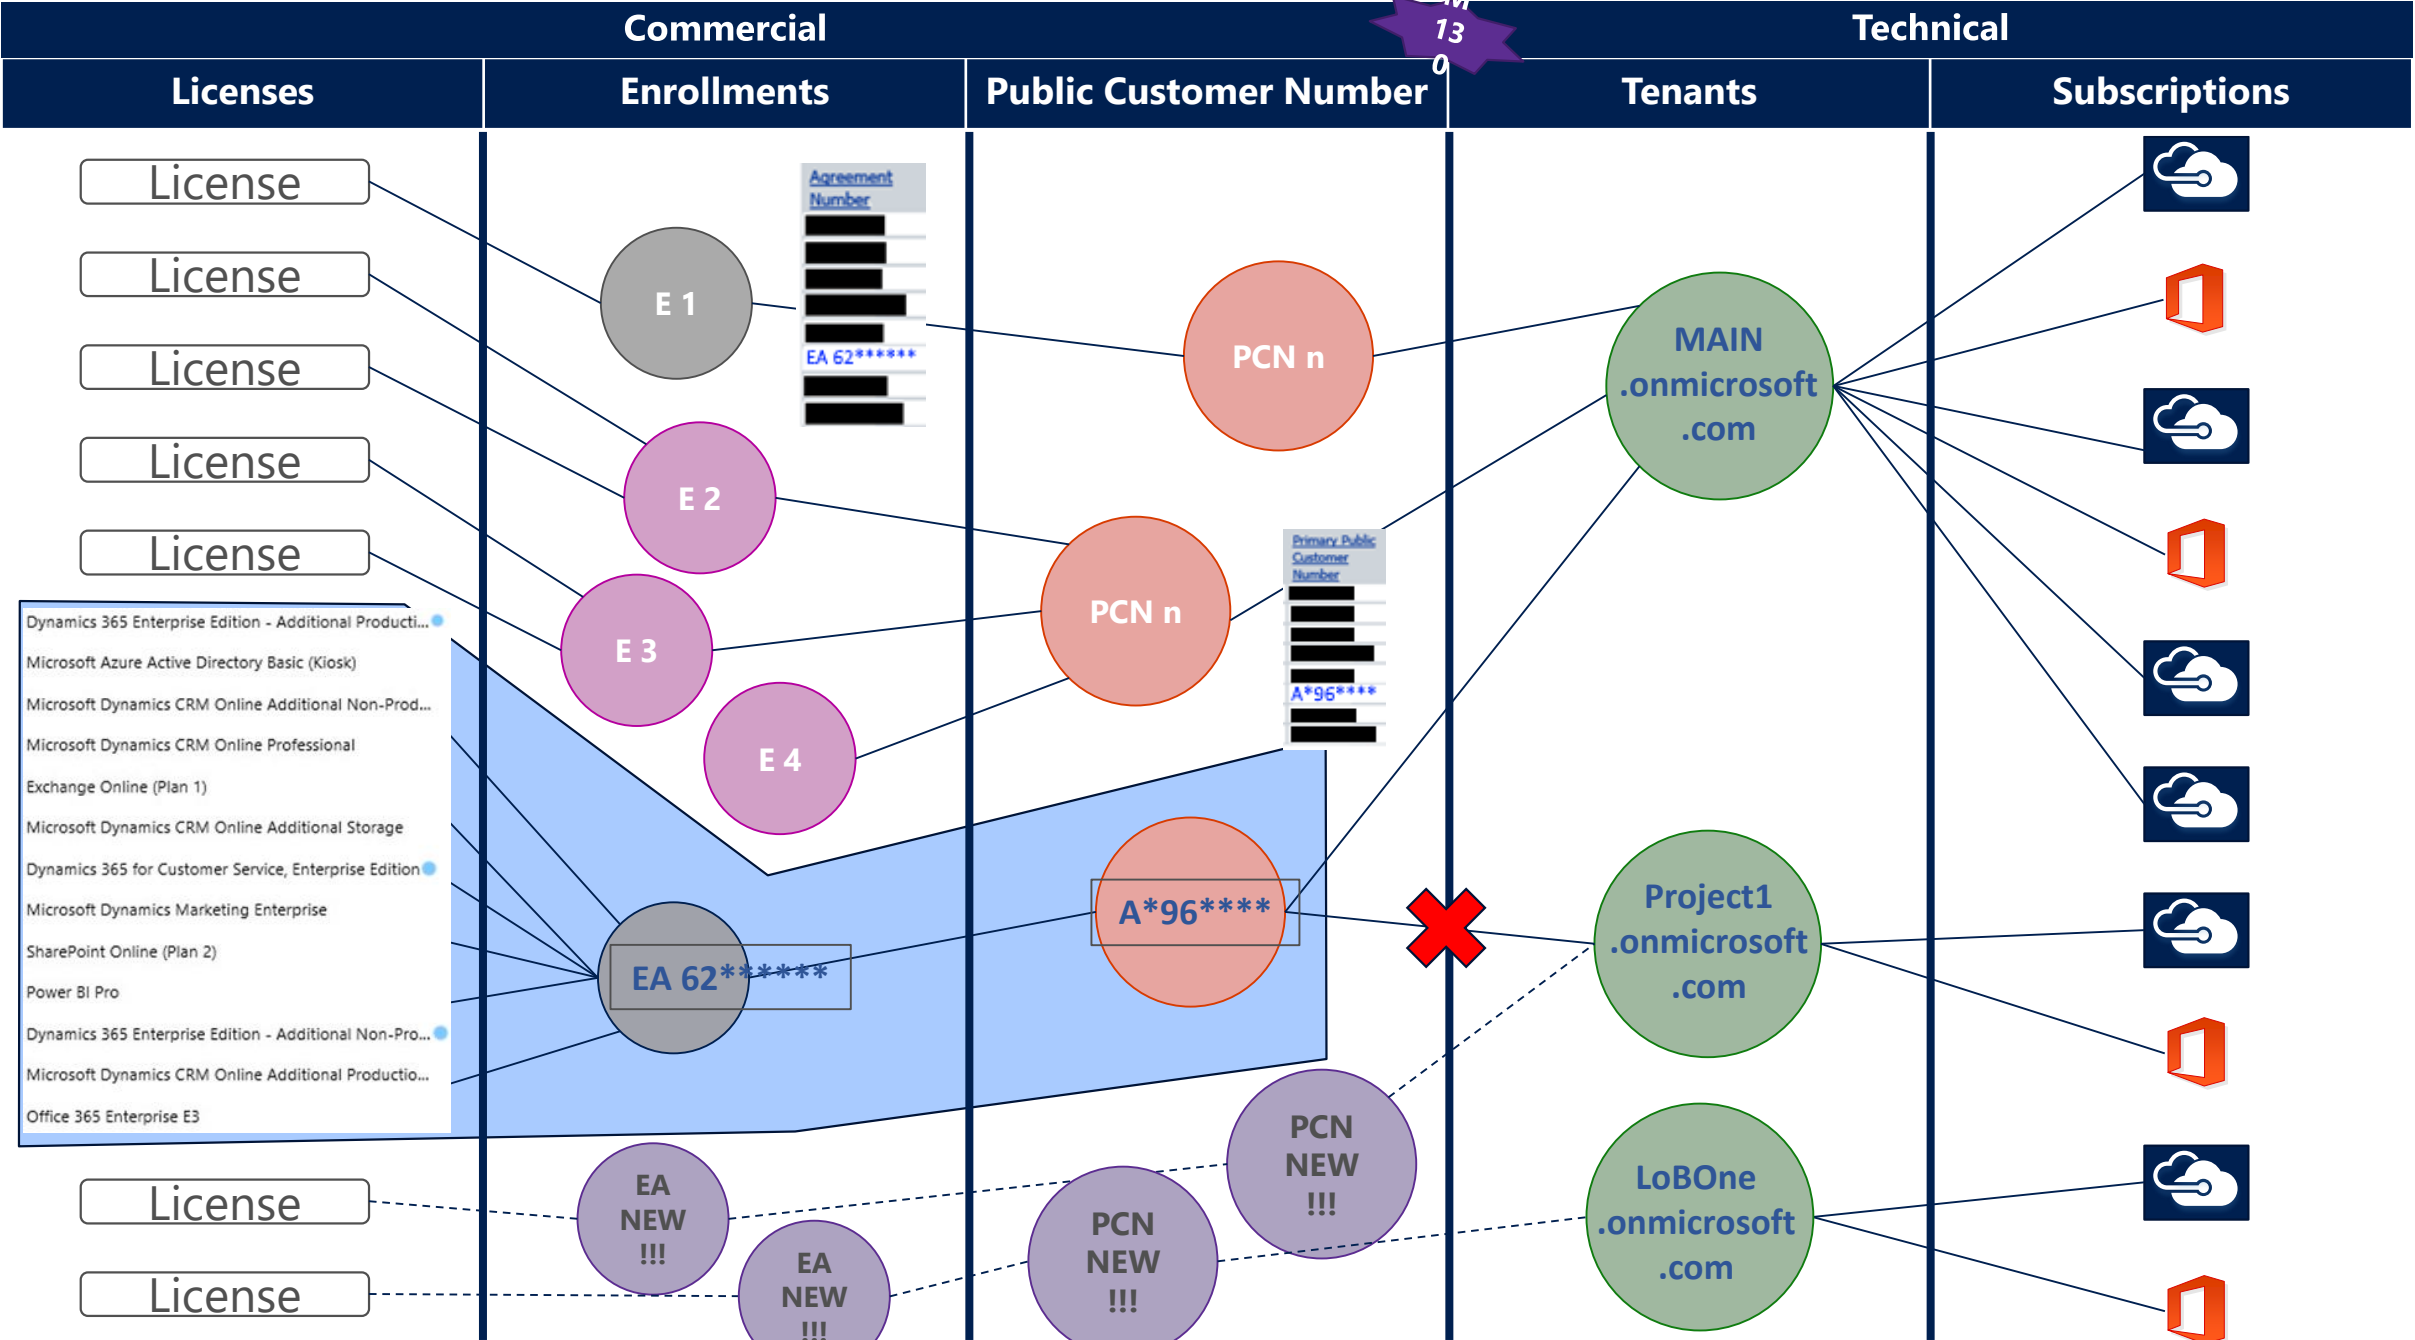

PCNs can only be assigned to one Azure tenant*

One PCN can have several agreements

Customers have a default technical tenant

* These tenants are technical tenants from Azure Active Directory. All Microsoft Cloud products make use of this structure.

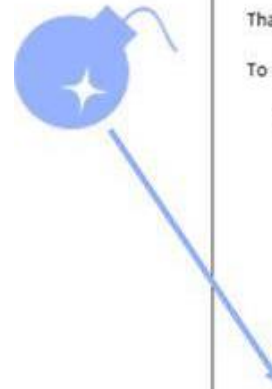

This is how it looks in the
background...

The Azure/Office 365/EMS
invitation mails...

Do not process the invitation mails

- Signing in with the logged in user from your browser e.g. **my.name@customer.com** will assign the licenses of this mail to the tenant that holds the DNS domain customer.com.
- To undo mistakes here the order has to be cancelled and the licenses have to be reordered.
- Get procurement and license management onboard to avoid this.

Please complete your profile to set up your Microsoft Online Services.

Dear [REDACTED]

Thank you for purchasing Microsoft Online Services through Microsoft Volume Licensing.

To start using your subscription, please choose one of the following options:

1. **USE AN EXISTING ACCOUNT**

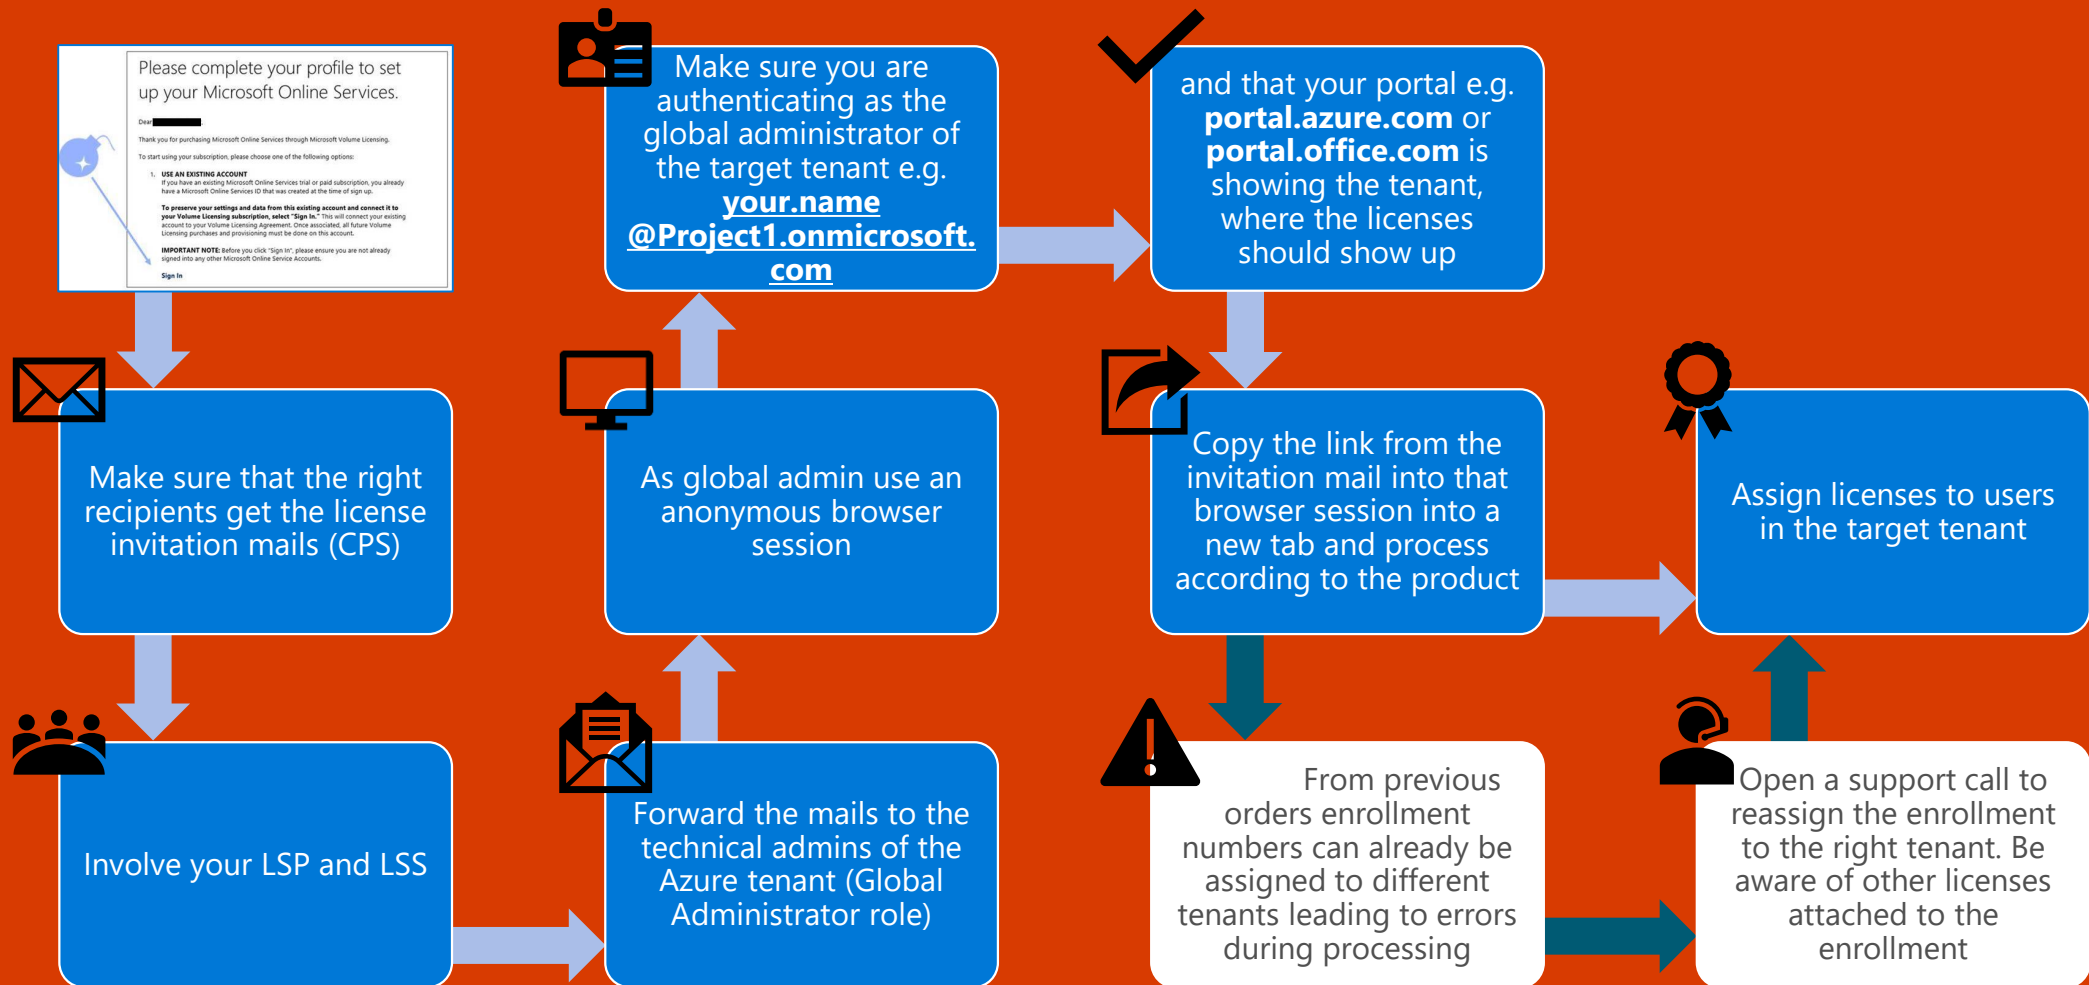

If you have an existing Microsoft Online Services trial or paid subscription, you already have a Microsoft Online Services ID that was created at the time of sign up.

To preserve your settings and data from this existing account and connect it to your Volume Licensing subscription, select "Sign In." This will connect your existing account to your Volume Licensing Agreement. Once associated, all future Volume Licensing purchases and provisioning must be done on this account.

IMPORTANT NOTE: Before you click "Sign In", please ensure you are not already signed into any other Microsoft Online Service Accounts.

Sign In

How to handle the invitation mails right

Get the licenses to the users

- Now that the licenses have been successfully mapped into the tenant, where they were asked for, the final step needs to be done.
- Assigning the licenses to the users...
- Can be done manually or automated via scripts. Some ISV offer solutions around that topic.

AZURE STRATEGY AND IMPLEMENTATION GUIDE

Authors:

Joachim Hafner (CSA)

Simon Schwingel (CSA)

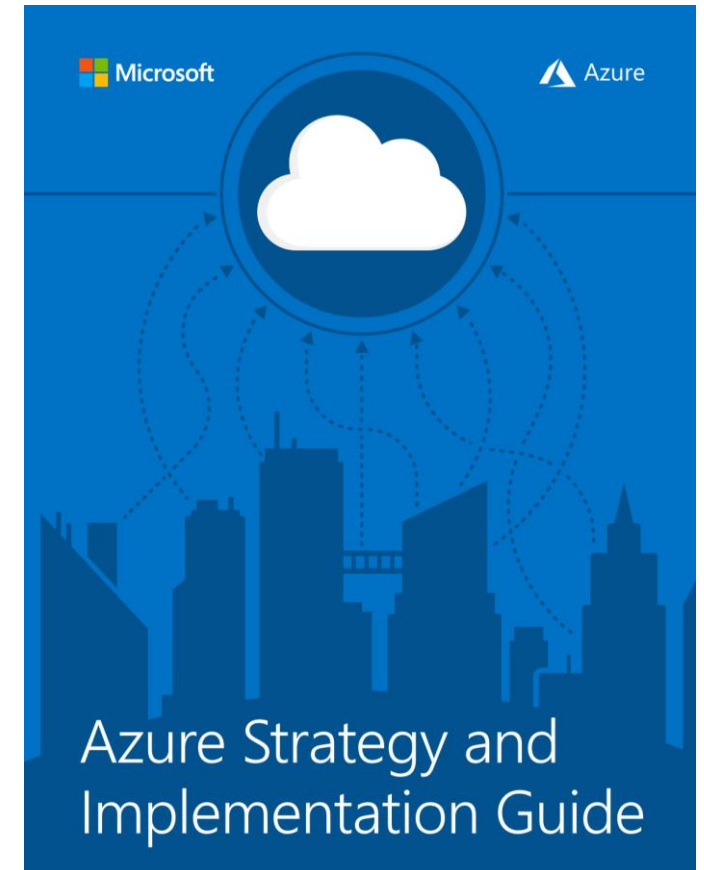

Tyler Ayers (CSA)

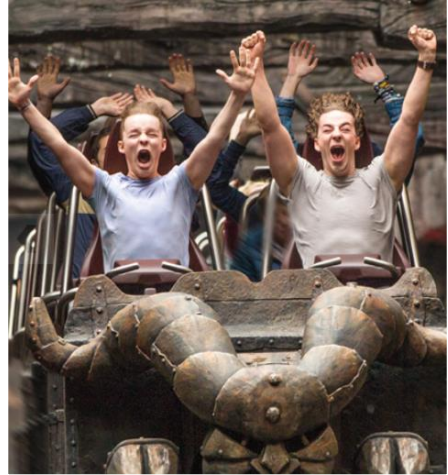

Rolf McLaughlin (MASUCH) (CSA)

Introduction by Britt Johnston,
Chief Technology Officer,
Cloud + Enterprise at Microsoft

New
version
7/6/2018

- While it's clear what the potentials of cloud computing are for your organization, it may be unclear the adjustments your IT organization will need to make in transitioning to the cloud.
- This guide is designed to help your IT team more effectively implement and integrate cloud technologies. You'll explore key cloud concepts as well as Azure-specific tips and tactics around:
 - General architectures that incorporate security, identity, and cloud design principles.
 - DevOps and how it fits with cloud technologies.
 - Integrating, planning, and managing cloud resources.

Thank You!
